Welcome to our “First Abu Dhabi Bank vs Peer Banks” report. In this document we compare FAB with some of the best known banks in the world – from the West (US, Canada, UK, Europe, Scandinavia, etc) to the Middle East region (GCC) and Asia (China, Hong Kong, Japan, Korea, India, Australia, etc) using only factual information and data. The approach we have followed for this analysis is as follows:

- We compare the peer banks across various parameters such as credit ratings, CDS spreads, CET1, RoTE, Capital Adequacy, etc.
- We have used “composite ratings” for this analysis – i.e. the average of the ratings assigned by three leading rating agencies Moody’s, S&P and Fitch – in order to provide a holistic view of the credit strength of each bank.
- We have deliberately made the report text-light and chart-based in an attempt to make it easier to digest. Hopefully you will find it both interesting and useful.

FAB is one of the top rated commercial banks in the world

FAB is proud to be one of the top rated commercial banks in the world. Below is a list of commercial banks those are rated AA- or higher by all three major rating agencies.

	Moody's			S&P			Fitch			Composite Rating	Composite Score	5-yr CDS level**
	Rating	Outlook	Score*	Rating	Outlook	Score*	Rating	Outlook	Score*

Note: * Market cap data is based on the closing price data as at 23-Jul-2019

Source: Bloomberg EMEA Banks Index (BEUBANK Index); Bloomberg World Banks Index; (BWBANK Index)

- As mentioned at the start of this report, we have used “composite ratings” for this analysis – i.e. the average of the ratings assigned by three leading rating agencies Moody’s, S&P and Fitch – in order to provide a more representative view of the credit strength of each bank.
- The composite rating is calculated as follows:
 - A score is assigned to the rating from each rating agency: AAA or equivalent being the best with a score of “1”, followed by AA+ or equivalent as “2”, AA or equivalent as “3”, AA- or equivalent as “4” and so on;
 - For example FAB is rated Aa3/AA-/AA- by Moody’s/S&P/Fitch. So the scores are 4/4/4;
 - Hence the average of the scores is “4” which indicates a composite rating of “AA-” for FAB;
 - In case the average score is not an absolute number – e.g. 4.33 (average of 4, 5, & 4) – the final score is derived by rounding off the average score to the nearest whole number. In this case “4”.
