This rally is all about liquidity, and there still is plenty of that

♦ **Stimulus measures have injected more than US\$2.6 trillion into the US economy since March.**

♦ **Historically, an increase in money supply tends to have a direct impact on the value of the dollar, gold and other risk asset classes.**

♦ **Economic growth also picks up after liquidity increases, though that comes with a lag.**

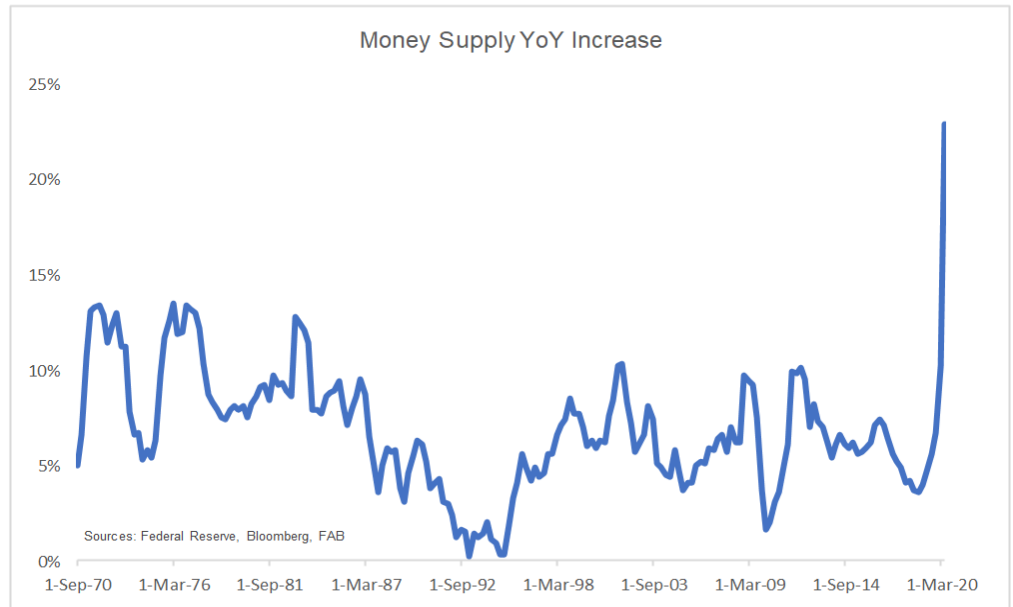

♦ **Record printing of dollars has created financial anomalies across the globe, from Australia to Europe.**

♦ **All this money, however, does not erase volatility and occasional spikes or corrections in some kinds of assets may still happen.**

♦ **The FAB AAC remains underweight equities while favouring gold and investment-grade debt.**

One of the raging debates going on right now is how can Wall Street and Main Street be so disconnected? While the employment and growth indicators have improved since their trough in April, they remain at levels that would be records before the staggering numbers in March.

Take away the data from the past six months, and the 10.2% unemployment rate in the US at the end of July would be the highest since 1982 and the second highest in history. The same goes for pretty much any data point not only in the world's largest economy, but across the globe. In the meantime, the quarter ended on 30 June was the sixth best three months period in the history of the index going back to 1970.

There are two answers for such huge discrepancy. The first is that the stock market is a forward-looking animal. Instead of focusing on where things are, share buyers want to know if things are getting better or worse. That makes sense, since an equity owner is rally banking on the growth of the business. If it starts shrinking, that is bad news, but if it can continue to grow, that is good.

The second reason is quite simply money. There is so much of it running around that stocks, and all other assets for that matter, simply see more demand. There are statistically sound relationships between liquidity and the performance of various asset classes.

For instance, over the past three decades gold has gained when liquidity increases. Again, that is rational: if the yellow metal is supposed to represent a certain amount of paper money, and now there is more of the latter (even if in digital form), then the exchange rate should change.

Increases in the M2 money supply have historically translated into faster growth

Similar relationships can be established for other asset classes. More money makes bonds (which theoretically offer returns above the inflation rate) more attractive and therefore push yields down. Lower yields make the expected discount rate for stocks lower, which, again, boosts the price of this asset class.

The most important, however, is that there is a sound statistical relationship between liquidity and growth. According to a regression using quarterly data going back 50 years, a 1% increase in M2, a measure of money supply, generates a commensurate increase in GDP after about six months. That relationship may not hold so perfectly in the current environment, but it suggests that growth in the US is about to pick up anyhow.

Investment Strategy Update

Disclaimer: This report has been prepared and issued by Products & Services - Elite & Private Banking ("P&S-EPB") of First Abu Dhabi Bank PJSC ("FAB") outlining particular services provided by P&S-EPB. This report is for general informational purposes and does not constitute or form part of any offer or invitation to sell, or any solicitation of any offer to purchase or subscribe for, any shares in FAB or otherwise or a recommendation for a particular person to enter into any transaction or to adopt any strategy nor shall it or any part of it form the basis of or be relied on in connection with any contract therefore. Anyone proposing to rely on or use the information contained in this publication should independently verify and check the accuracy, completeness, reliability and suitability of the information and should obtain independent and specific advice from appropriate professionals or experts.

This report is provided on a confidential basis for informational purposes only and is proprietary to P&S-EPB. This report may not be disclosed to any third party or used for any other purpose without the prior written consent of P&S-EPB. The manner of circulation and distribution may be restricted by law or regulation in certain countries, hence any unauthorised use or disclosure of this document is prohibited.

The information in this report reflects prevailing conditions and our views as of this date, which are accordingly subject to change. In preparing this report, we have relied upon and assumed, without independent verification, the accuracy and completeness of all the information available from public sources or which was otherwise reviewed by us. FAB PJSC makes no representation or warranty, expressed or implied, as to the accuracy, timeliness or completeness of the information in this report. FAB PJSC shall have no liability to the Customer or to third parties for the quality, accuracy, timeliness, continued availability or completeness of any data or calculations contained and/or referred to in this report nor for any special, direct, indirect, incidental or consequential loss or damage which may be sustained because of the use of the information contained and/or referred to in this report or otherwise arising in connection with the information contained and/or referred to in this report, provided that this exclusion of liability shall not exclude or limit any liability under any law or regulation applicable to FAB PJSC that may not be excluded or restricted.

Past performance is not a guarantee of future performance and should not be seen as an indication of future performance due to a variety of economic, market or other factors. The information contained in this report does not purport to contain all matters relevant to any particular investment or financial instrument and all statements as to future matters are not guaranteed to be accurate. Any projections of potential risk or return are illustrative and should not be construed as limitations of the maximum possible loss or gain. Data included in this report may not take into account all potentially significant factors, such as market risk, liquidity risk and credit risk. Undue reliance should not be placed on forward looking statements in making an investment decision.

In addition, our analysis are not and do not purport to be appraisals of the assets, stock or business of the recipient and has been prepared without taking into account the objectives, financial situation or needs of particular person. Even when this presentation contains a kind of appraisal, it should be considered preliminary, suitable only for the purpose described herein and not be disclosed or otherwise used without the prior written consent of P&S-EPB. FAB clients may already hold positions in the assets subject to this report and may accordingly benefit from the buying or selling of such assets as referred to in this report. This document does not purport to set out any advice, recommendation or representation on the suitability of any investment, transaction or product (as referred to in this document or otherwise), for potential purchasers. In receiving this report, the client is fully aware that there are risks associated with investment activities. Potential purchasers should determine for themselves the relevance of the information contained in this document and the decision to purchase any investment contained herein should be based on such investigation and analysis as they themselves deem necessary. Before entering into any transaction potential purchasers should obtain the investment offering materials, which include a description of the risks, fees and expenses and ensure that they fully understand the potential risks and rewards of that transaction (including, without limitation, all financial, legal, regulatory, tax and accounting consequences of entering into the transaction and an understanding as to how the transaction will perform under changing conditions) and that they independently determine that the transaction is appropriate for them given their objectives, experience, financial and operational resources and other relevant circumstances. Potential purchasers should consider consulting with such advisers and experts as they deem necessary to assist them in making these determinations.
