In line with its ESG methodology, the Fund promotes, inter alia, the aforementioned environmental criteria but does not commit to invest in taxonomy-aligned environmentally sustainable activities which contribute to the environmental objectives set out under Article 9 of Regulation (EU) 2020/852.

Environmental, Social and Governance ("ESG") Investment Risk - ESG investments are selected or excluded on both financial and non-financial criteria. The Fund may underperform the broader equity market or other funds that do not utilize ESG criteria when selecting investments. The Fund may sell a stock for reasons related to ESG, rather than solely on financial considerations. ESG investing is to a degree subjective and there is no assurance that all investments made by the Fund will reflect the beliefs or values of any particular investor. Investments in securities deemed to be 'sustainable' may or may not carry additional or lesser risks.

Sustainability Risk - Sustainability risks mean an environmental, social, or governance event or condition that, if it occurs, could potentially or actually cause a material negative impact on the value of Fund's investment. Sustainability risks can either represent a risk of their own or have an impact on other risks and may contribute significantly to risks, such as market risks, operational risks, liquidity risks or counterparty risks. Sustainability risks may have an impact on long-term risk adjusted returns for investors. Assessment of sustainability risks is complex and may be based on environmental, social, or governance data which is difficult to obtain and incomplete, estimated, out of date or otherwise materially inaccurate. Even when identified, there can be no guarantee that these data will be correctly assessed. Consequent impacts to the occurrence of sustainability risks can be many and varied according to a specific risk, region or asset class. Generally, when sustainability risk occurs for an asset, there will be a negative impact and potentially a total loss of its value and therefore an impact on the net asset value of the Fund.
