(Incorporated in Abu Dhabi With Limited Liability)

BASEL III: PILLAR 3 DISCLOSURES AS AT 31 DECEMBER 2022
(CURRENCY: INDIAN RUPEES IN MILLIONS)

1. Capital Adequacy

Qualitative Disclosures:

The CRAR of the Bank 31.83 % as computed under Basel III norms, which is higher than the minimum regulatory CRAR requirement of 9.00% plus capital conservation buffer of 2.50% taking total to 11.50%.

The Bank's capital management approach is driven by the desire to maintain an appropriate capital base and to maintain an adequate buffer in support of its business development and to meet the regulatory capital requirements stipulated by the RBI at all times. Implications of major business decisions on the Bank's capital position are taken into account by the India Executive Committee (India EXCO) of the Bank and the FAB Group, prior to implementation, in order to preserve the Bank's overall capital requirements.

The Bank's capital requirements are drawn up annually in conjunction with the financial budgeting exercise and approved by the FAB Group for implementation at the beginning of each financial year. The capital requirements take into account, inter alia, the Bank's strategic objectives and business plans and regulatory capital requirements.

BASEL III: PILLAR 3 DISCLOSURES AS AT 31 DECEMBER 2022

General Disclosures for Credit Risk

Qualitative Disclosures

FAB India follows the Group Credit Policy and has also developed an India Credit Policy Addendum which together covers all stages of the credit life cycle, viz. origination, assessment and measurement, pricing, approval, commitment, administration, operations, monitoring, reporting, remedial management and portfolio management. It addresses all the businesses of the Bank where credit risk is presently being assumed, in any manner.

The Policy provides a set of policies to establish and maintain the following including, but not limited to:

- An appropriate credit risk environment,
- A sound credit granting process,
- An appropriate credit measurement, monitoring and reporting process, and
- Adequate controls over credit risk, in all business segments at, both, the individual credit and portfolio levels. It also seeks to establish a common quality standard for the management of credit risk.

Risk rating system

The Bank uses an internal risk rating system to assess the credit quality of borrowers and counterparties. Each counterparty is assigned a rating, including classified accounts that are either watch list or non-performing. The risk rating system has 11 grades, further segregated into 23 notches. Grades 1-6- are performing, Grade 7-8 is Watch-list and Grades 9 - 11 are non-performing, each with a rating description.

Approach to Obligor Risk Rating: Credit Risk rating measures the creditworthiness, that is, the ability to repay debt, of an individual, a corporation or a sovereign in a consistent manner.

Based on the current rating landscape, 11 rating models have been developed to rate the corporate clients as depicted below. These 11 models are further classified into Quantitative and Qualitative model.

The Group has implemented bespoke models and scorecards using its own data and expert judgment for:

- Borrower risk rating models for Corporate, SMEs, and High Net-Worth Individuals.
- Facility risk rating models for Project Finance and Real Estate.

Model performance and usage are monitored regularly by the Group and are reported to the Group senior management and risk committees. All models are subject to periodic in-depth reviews by the Group to ensure that they remain fit-for-use and appropriate to the underlying portfolio segment and geography

The output of each model and scorecard is mapped to an internal rating scale. Each grade in the rating system is linked to a Probability of Default (PD) estimated using the Group default experience supplemented by data from external sources.

Sovereign and bank exposures are governed by the ratings from external credit rating agencies.

Risk Monitoring

The Bank regularly monitors its credit risk in respect of all its portfolios at various levels. At the obligor level, the Bank has a process of periodic review of credit based on the internal rating grades. More frequent reviews are made for the weaker credits and less frequent reviews for the superior credits. The Bank conducts full reviews and renewals of all performing credits at least annually. Obligors with lower risk profile are monitored at lower frequency by business units, unless otherwise required, to evaluate the potential changes in credit worthiness and related impact on risk rating based on latest available financial and other relevant information. More frequent and focused monitoring for lower rated borrowers ensures early identification of potential impairments, if any.

The classification and impairment policy currently implemented by the Group classifies delinquent borrowers as Substandard, Doubtful or Loss in line with the guidelines laid down in the Central Bank of United Arab Emirates' (CBUAE) circular 28/2010. The Bank in India will comply with the Group policy as well as the RBI's Master Circular - Prudential Norms on Income Recognition, Asset Classification and Provisioning pertaining to Advances dated 01 July 2015. Currently there are no non-performing exposures

In assessing the collective loss allowance, the Bank uses the charge of 0.4% (and other specified rates) of standard assets and credit equivalent of FX and derivative exposure as stipulated in the above RBI circular.

Watch-listed accounts are also monitored and reported to senior management. This category comprises accounts where either contractual principal or interest is past due or when the accounts show weakness in the borrower's financial position and creditworthiness and requires more than normal attention. Such weakness is specifically monitored to ensure that the quality of the asset does not further deteriorate. Currently there are no Watch-listed accounts.

The Bank monitors all excesses over limits. The monitoring reports are available to senior management and processes are initiated to realize and regularize such excesses, where outstanding.

The Bank monitors the existing portfolio based on country, industry and ratings. These portfolio reports are prepared periodically and tabled for review by senior management. FAB India's exposure to a particular industry / sector would be limited to the individual sector caps as per the Group Industry Limits Monitoring Methodology with exceptions if any to be suitably ratified by Branch Risk & Compliance Committee (BRCC).

2. Disclosures for Portfolios Subject to the Standardised Approach

Qualitative Disclosures

The Bank uses the External Credit Assessment Institutions (ECAI) approved by the RBI to calculate its capital adequacy for sovereigns, banks, and corporate counterparties. For all exposures to domestic corporates, ratings by the following ECAs are to be considered in line with 5.8 of RBI's Master Circular on Basel III Capital Regulations dated 01 July, 2015 and subsequently modified vide RBI/2022-23/162 DOR.STR.REC.94/21.06.008/2022-23 dated January 9, 2023 - Credit Analysis and Research Ltd; CRISIL Ratings Ltd; India Ratings and Research Pvt. Ltd; ICRA Ltd; Acuite Rsatings & Research Ltd. and Infomerics Valuation & Ratings Pvt. Ltd.

Claims on Indian banks and Indian branches of foreign banks will be risk weighted in line with the RBI's Master Circular on Basel III Capital Regulations dated 01 July, 2015 based on the CET1 and applicable CCB ratio levels set out.

Ratings from Fitch, Moody's and Standard & Poor's are considered for risk weights for claims on foreign sovereigns, foreign public sector entities and foreign banks as set out in the RBI Master Circular.

The use of the ratings and mapping process will be in line with the RBI Master Circular.
